GENERAL INFORMATION

- For Photography of Artwork you have the choice of many different color backgrounds including a variety of neutral colors from black to white.
 - It's best for the artist to be present during the photography of 3D artwork so as to pick the best angles & details.
- For each photoshoot you will be furnished a variety of different types of images separated into individual folders which can include:
 - TIFF - these are the full resolution high quality images
 - JPEG - These are compressed images for Web sites, competition, sending by email
 - ZAPP - These images are prepped specifically for Zapplication <http://www.zapplication.org> for entering into various shows. These images are also useful even if you don't submit them to Zapplication
- All images are optimized for the highest quality which includes color correction, tonal correction, sharpening and sizing.
